Getting to know your thermostat

- ① LCD Display
- ② Glow in the Dark Light Button
- ③ Temperature Set Point Buttons
- ④ Fan/User Button
- ⑤ System/User Button

Top Text Field
Used in programming, will also show Time of Day when a schedule program is being used.

Indicates the current room temperature.

Displays the user selectable Setpoint temperature.

Indicates mode of system running.

WIFI Connection Indicator

Bottom Left Text Field Used in programming and Hold functions. Will also show current Fan setting.

Fan Indicator

WIFI Signal Strength

Bottom Right text field Used in programming and Hold functions. Will also show current System setting.

Easy to use controls

Note:

④ Fan button and ⑤ system button, are also used to interact with a programmed schedule if using one through the WIFI connected app.

See top of next page for explanation

① LCD Display:

See page 2 for details about this display readout and icons.

② Glow in the Dark Light Button:

The glow in the dark light button will self illuminate for several hours after exposure to ambient light. This button turns on the display light when pressed.

③ Temperature Setpoint Buttons:

Press the + or - buttons to select the desired room temperature.

④ Fan Button:

Select **ON** or **AUTO**. **ON** will run the fan continuously. **AUTO** will run the fan only when the heating or cooling system is on.

Note: Some applications may have fan control disabled.

⑤ System Button:

Select the operation mode of your HVAC system. Selecting **HEAT** will put your system in heating mode. Selecting **COOL** will put your system in air conditioning mode. Selecting **OFF** turns both heating and cooling off.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment under FCC rules.

Operation of ④ fan button & ⑤ system button when connected to WIFI and running a programmed schedule from the app.

When the Set At temperature is changed while an app schedule is running, the thermostat will enter a temporary hold, and the Fan and System buttons change to RUN and HOLD for 5 seconds. If you wish to enter PERMANENT HOLD press the HOLD button at this time.

If you don't press the HOLD button within the 5 seconds, it will remain in temporary hold for 4 hours.

When connected to WIFI you may also have the ability to turn programming ON or OFF by pressing and holding the FAN button for 3 seconds, while the FAN BOX appears.

Warranty Registration:

Your new thermostat has a 3 year limited warranty. You must register your warranty within 60 days of installation. You can register your new thermostat in 2 ways.
